

150W Constant Power Mode with DALI-2 LED Driver

Features

- Wide input range 100~305V AC(Class I)
- Full power output at 70~100% Constant power mode operation
- Metal case with IP67, suitable for outdoor application
- Surge protection with 6KV/4KV
- DALI-2 Dimming with minimum level 8%
- 12V/250mA Auxiliary power available(optional)
- India (EESL) version with Input Over Voltage Protection can survive input voltage stress of 440Vac for 48 hours
- Protection functions: SCP/OTP
- Life time >50,000 hrs. and 5 years warranty

Applications

- · Street lighting
- Floodlight Lighting
- · Stage lighting
- Fishing lighting
- · Horticulture lighting
- Bay lighting
- Type HL for use in class I, Division 2

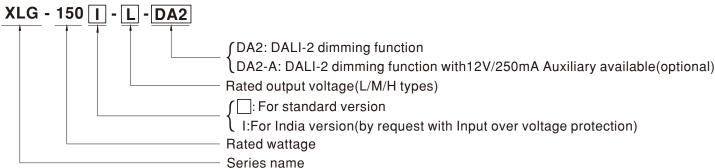

Description

GTIN CODE

MW Search: https://www.meanwell.com/serviceGTIN.aspx

XLG-150-DA2 series is a 150W LED AC/DC driver featuring the constant power mode with DALI-2 dimming function. XLG-150-DA2 operates from 100~305VAC and offers models with different rated current ranging between 700mA and 4170mA. Thanks to the high efficiency up to 93%, with the fanless design, the entire series is able to operate for -40 $^\circ$ C ~+90 $^\circ$ C case temperature under free air convection. The design of metal housing and IP67 ingress protection level allows this series to fit both indoor and outdoor applications. Moreover the innovative environment-adaptive capability allows this series to reliably light on the LEDs for all kinds of application environments in almost any spots that may install LED luminaires in the world. XLG-150-DA2 series comply with the latest version of IEC61347/GB19510.1 and UL8750 international safety regulations. The output and dimming circuit are also completely in accordance with the new regulations with isolation to ensure the safety of both user and luminaire system during installation.

	PACKING	0.8Kg;16pcs/13.4Kg/0.67CUFT					
NOTE		All parameters NOT specially mentioned are measured at 230VAC input, rated current and 25℃ of ambient temperature. Please refer to "DRIVING METHODS OF LED MODULE".					
	3. Tolerance : includes set up tole	rance: includes set up tolerance, line regulation and load regulation.					
		De-rating may be needed under low input voltages. Please refer to "STATIC CHARACTERISTIC" sections for details. Length of set up time is measured at first cold start. Turning ON/OFF the driver may lead to increase of the set up time. Especially when the temperature					
	inside driver is very high, it will	is very high, it will lead to a longer set up time.					
	6. Based on IEC 62386-101/102 DALI power on timing and interruption regulations, the set up time needs to test with a DALI controller which can support for						
	DALI power on function, otherwise the set up time will be longer than 500ms.						
	7. Input over voltage only for XLG-150 I series, and I series without UL/CSA certificate. 8. The driver is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the						
	complete installation, the final e	lete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.					
	(as available on https://www.meanwell.com//Upload/PDF/EMI_statement_en.pdf) 3.5°ℂ/1000m with fan models for operating altitude higher than 2000m(6500ft).						
	10. Please refer to the warranty s	fer to the warranty statement on MEAN WELL's website at http://www.meanwell.com					
	1. This series meets the typical life expectancy of >50,000 hours of operation when Tcase, particularly (c) point (or TMP, per DLC), is about 75℃ or less.						
		ed from the Americas regions may not have the CCC/PSE/BIS/KC logo. Please contact your MEAN WELL sales for more information. tion note and IP water proof function installation caution, please refer our user manual before using.					
	https://www.meanwell.com/Upl	pload/PDF/LED_EN.pdf					
	14. The efficiency will drop 1% based on auxiliary power version with full load 3W condition.						

14. The efficiency will drop 1% based on auxiliary power version with full load 3W condition.

15. H/M type: RCM is on a voluntary basis. Non IC classification Independent LED control gear is not suitable for residential installations;

L type: RCM is on a voluntary basis and meets relevant IEC or AS/NZS standards complying with AS/NZS 4417.1

16. To fulfill requirements of the latest ErP regulation for lighting fixture, this LED driver can only be used behind a switch without permanently connected to the mains.

■ DIMMING OPERATION

*** DALI Interface**

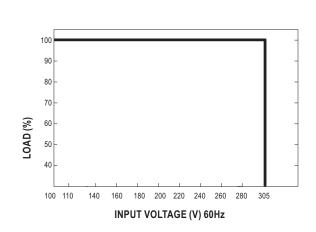

- Apply DALI signal between DA+ and DA-.
- DALI protocol comprises 16 groups and 64 addresses.
- First step is fixed at 8% of output.

■ OUTPUT LOAD vs TEMPERATURE

Note:1. The output current must be derated at ultra-high ambient temperature. 2.Below 120VAC@-30°C may has restart situation within 5s after power-on.
